Apc Pcns Vmware Download For Mac

Not sure if the community is aware yet, but the latest version of APC PCNS, v3 0.. 0 is now free Albeit you need to have a supported Management Card installed in the UPS to use it.. It has a release date of 19may2011 I already had v2 4 4 installed on a ESX 4 1 box and it ran without issues and did shutdown the guests when your configuration in VMware is correct.
